ACTIVITY 1 IN CALCULUS-BASED PHYSICS 1

Periodic Table of Measurement Units

A **measurement unit** is a standard quantity used to express and compare physical amounts such as length, mass, time, temperature, and volume. These units provide a common language that helps people accurately measure and communicate values in science, mathematics, and everyday life. In this activity, measurement units and their abbreviations are organized in a format inspired by the periodic table to make them easier to learn and remember.

°C Celsius	°F Fahrenheit	K Kelvin					
mg Miligram	g Gram	km Kilogram	t Metric Ion	oz Ounce	lb Pound		
mm Millimeter	cm Centimeter	m Meter	km Kilometer	in Inch	ft Foot	yd Yard	mi Mile
mL Milliliter	L Liter	cc Cubic Centimeter	m^3 Cubic Meter	c Cup	gal Gallon	pt Pint	qt Quart
s Second	min Minute	h Hour	d Day	wk Week	mo Month	yr Year	

Legend:

- Length/Distance
- Mass/Weight
- Volume/Capacity
- Time
- Temperature
